

SHORTLINER NEWS

DFK Equipment Sales Inc.— News Letter

February 2016

New Division in Quebec!

As of December 1st 2016, DFK has launched Les Equipements DFK Inc.

This new venture has three shareholders Jean Boucher, Francois Boucher and Wayne Barber. This will allow DFK to offer the same service and support in Quebec that we have provided in Ontario for 35 years. Offering a warehouse in Victoriaville, Quebec supported by sales, parts and service team.

2017 Exciting Year for New Products for DFK

Never in DFK's history have we had our manufacturers step up to the plate by offering so many new products.

This news helps prove and support our Mission Statement and philosophy.

For Canadian agricultural equipment manufacturers, innovation is not just a way of being or something that happens in an isolated facility, it is in how we manufacture and manage day-to-day operations. -

Les Equipements DFK Inc.— Warehouse, Victoriaville QC

New Division in Quebec!

This new venture will be managed by Francois Boucher.

There is no doubt Francois's energy and enthusiasm will drive this to the same success we have experienced in Ontario.

Francois and his staff are fully bilingual (French/English) to communicate with our manufacturers and support our dealers to the fullest.

Groupe Anderson inc., had very busy year in 2016.

- with plant expansion and introduction of new products

TMR Vertical Mixers

In early 2016 Groupe Anderson inc. began expansion of plant to accommodate the production of their new TMR Vertical Mixer line launched late in 2016. With the expertise and support from long time TMR manufacturer Lucas Manufacturing from France, Anderson introduced a full range of Vertical mixers.

Stack-Pro Bale Carrier

The time taken by contractors to get straw bales off harvested fields is one of the biggest problems for farmers who decide to sell their straw.

Investing in specialist bale collection kit such as Anderson's Stackpro bale collector will help speed up the job. It can shift bales up to 1,100kg in weight and can carry up to 12 bales at a time with a 120x130cm cross-section.

Pro-Chop 150

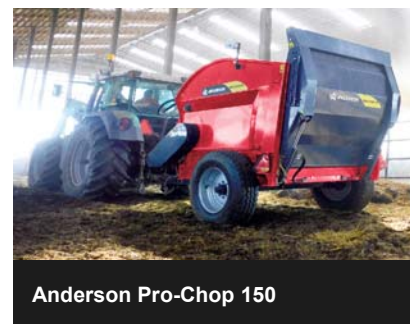

In 2015 Anderson launched the line of Bale Processors. Through out the year we did many demonstrations and listened to our customers. Passing the information back to Anderson that our customers wanted a finer cut 1 to 2" with flexibility of longer cut when wanted , Anderson engineers went to work and developed the Pro-Chop 150 that gives us the flexibility to get desired cutting length at the same reasonable price as previous processors.

Norwood Partners with DFK for Marketing in Eastern Canada

Norwood's roots are very much like DFK. Starting out as a Farm Equipment Distributor many years ago, they became frustrated with marketing strategies of some of these manufacturers and then began manufacturing. They still distribute some products to this day.

DFK is pleased to have partnered with Norwood such an innovative manufacturer of quality equipment.

The very first thing we noticed about Norwood is their very down to earth approach to marketing and how approachable Dan Norwood is himself to us as well as dealers. Dan is on the ground listening to what dealers and farmers are saying to develop products to meet their future demands.

All our sales staff are excited to introduce the line of Norwood product to Eastern Canada.

Norwood - Kwik-Belt Conveyor

Norwood launches Kwik-Belt

Like many of the Norwood products, the Kwik-Belt was developed after many years of being one of the largest distributors of a very popular brand of belt conveyors.

When this relationship ended Norwood took their expertise with this product and incorporated all the qualities and features they had wanted into their new Kwik-Belt product.

They now offer a full range of belt conveyors with features and benefits ahead of the competition.

DFK brings Norwood Kwik-Till to Eastern Canada

Already this fall DFK began an aggressive demonstration program with the Norwood Kwik-Till. Don't hesitate to request a demonstration.

The Kwik-Till offers many features, sizes from 10' to 45' to meet all our farmers needs in all demographics of Eastern Canada. Kwik-Till offers farmers needs for spring and fall tillage with wide range of finishing rollers and a narrow transport width to meet road travel requirements.

DFK Introduces Norwood Full product range

Kwik-Kleen

The Kwik-Kleen grain cleaner allows you to clean your grain at harvest time. Clean grain dries and stores better, saving you time and money. It is compact to fit in confined areas but large enough to keep up with most harvest conditions. It comes equipped with variable speed control and grain feed rate adjustment, and the cleaning area is full circumference of tubes. The majority of cleaning is done on the sides and tops of tubes.

Seed Shuttles

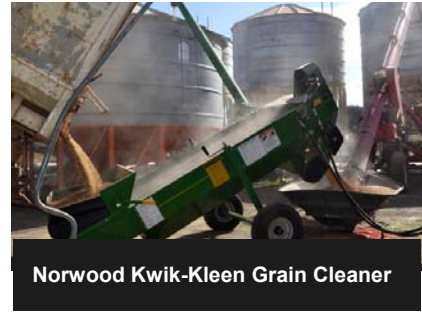

The Seed Shuttle brand of seed tenders is the only tender on the market with non-Corrosive poly tanks. Seed Shuttle comes in three different sizes and three different Configurations. Customers can choose any configuration between, just the tender to be put on your trailer, seed tender on our trailer with bumper hitch, to the seed tender on our trailer with a gooseneck hitch. The sizes are measured in Units with three different models available. The smallest unit machine is the SS290 rated at 290 units, next is the all new SS400 rated at 400 units, and the largest the SS500 rated at 500 units.

Uni-Body Stainless Steel Tender

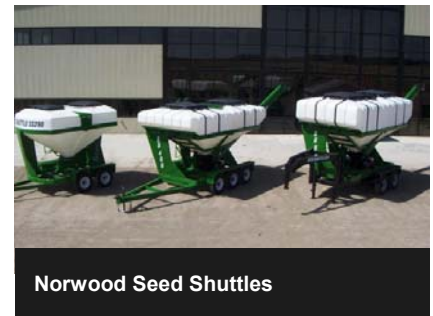

Is a commercial seed/fertilizer tender made of stainless in the hoppers including in the semi frame. This allows for lighter weight trailer which means more product can be hauled down the road.

Bin & Bin Accessories

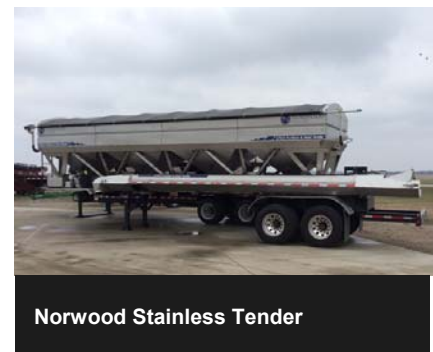

Norwood Sales offers an extensive range of bins and bin accessories ranging from Smooth Wall Bins, Underbin Conveyor Systems, Unload Tubes w/ Power Sweeps and Grain Guard Products.

**Launches
Fertilizer
Application
Toolbars**

As the creators of high quality farm equipment such as 50 Series Sprayers & SideQuest saddle tanks,

Demco is very pleased to offer our 1050 & 1250 model trailer liquid fertilizer applicators. Using our experience and expertise in the industry, we have developed the 1050 & 1250 applicators loaded with quality and features that will perform for you in the field. These units are available with either 40' or 60' toolbars.

Loftness Fertilizer Spreaders

Loftness launches Fertilizer Spreaders / Tenders

The FS800 is an all-purpose fertilizer spreader that is feature packed for ultimate versatility and durability. It boasts a double-axle design with an integral adjustable-height hitch and 2.5-inch-wide leaf springs, resulting in level operation and improved ride quality on uneven terrain. Dual stainless steel spinners deliver a total overlapping trapezoidal pattern of up to 90 feet with an optional hydraulic drive, which also offers variable rate applications.

With a single-axle design and 44-inch clearance, the RC800 Fertilizer Spreader is ideally engineered for row crop applications. It includes a variable tread width from 80 to 120 inches to accommodate virtually any row spacing. The RC800 comes equipped with a positive mechanical conveyor drive, which eliminates the slippage problems of competitive friction wheel drives. It can also be fitted with an optional hydraulic conveyor drive, which delivers a total overlapping trapezoidal pattern of up to 90 feet and offers variable rate applications.

The FT1600 Fertilizer Tender features a rear discharge, two material compartments and heavy-duty construction to withstand the abuse of fertilizer handling applications. It's available with either 21- or 24-foot auger lengths, and the 10-inch-diameter discharge augers are constructed of 409 stainless steel for maximum resistance against abrasion and corrosion.

Loftness Fertilizer Tender

Highline CFR 960 Square and Round Bale Processor

Highline

NEW

CFR960 Bale Pro®

Ideal for feeding and bedding - the CFR 960 Bale Pro® offers all of the proven design features found on the Highline Bale Pro® series but with the added real flexibility to process square or round bales (simply, with the turn of a dial).

The unique engineering of the CFR 960 Bale Pro® allows you to efficiently process square or round bales - the choice is up to you! This is useful when you have multiple feed suppliers using different bale types.

Jacto Launches

Battery Powered Back Pack Sprayer

Jacto's PJB battery operated backpack sprayer is available in both 4 and 5 gallon capacities. With a long-lasting removable battery, soft padded shoulder straps and five constant pressure settings, the PJB is the most desirable sprayer in its category.

Battery Powered Pruner

The ergonomically designed PR40 is the only battery pruner on earth with 7 internal sensors, allowing for a strong and extremely accurate progressive cut. The pruner and battery pack can be quickly configured for either right or left hand operation. The Lithium Ion battery pack includes a digital display showing battery life and the total number of cuts for the pruner. An audible warning system alerts the operator to certain functions of the pruner. Long lasting battery pack for all day use. Depending on diameter and hardness battery life per charge is up to 15 hours and in average .750" diameter green material, up to 20,000 cuts per charge.

Remlinger Purchases Sukup AG Implements

Remlinger Mfg. Co., Kalida, Ohio, announces it has purchased the Implement Division of Sukup Manufacturing Co. of Sheffield, Iowa. The purchase includes the following products: grain drills, row crop cultivators, crop shredders, rotary cutters, food plot planters, seeders, grain carts, and rippers. "We feel this acquisition is a tremendous opportunity for Remlinger Mfg. to further diversify our product line and will strengthen our dealer relationships going forward," said John Remlinger, President of Remlinger Mfg.

Remlinger 9400 Cultivator

Remlinger launches redesigned (Sukup) 9400 Cultivator

Remlinger's 9400 cultivator builds the perfect seedbed. Patented, wrench less adjustments make the 9400 the easiest cultivator on the market to adjust. Creates a bed with furrow bottoms that are firm and ridge shoulders that are uniform. Optional ridging wings put the best soil up around the plants where it's needed most. Wide variety of sweep shares available to cultivate in many different types of soil.

Remlinger 10' Drill

Remlinger introduces redesigned (Sukup/Marliss) drill line

In spring 2017 Remlinger Mfg Co introduces their new 2300 Series line of no-till drills. These drills are available in 5' through 15' sizes with small seed and native grass boxes available.

Grasshoppers "New" 125 Kohler and 126 Briggs w/ 61" Deck

New, Full Metal Enclosure

Grasshopper introduces two new models in 100V series with new look for complete range. The 200V series now offers 27 hp EFI engine. So popular in the 300 and 700 Series.

Also launched in fall of 2016 the full metal enclosure for a tight fit and to meet those commercial needs.

What's Coming!

Pequea

Summer 2017, Pequea will launch there expanded wheel rake line to include larger center delivery wheel rakes to give them a complete line of rakes between the current Mid-Cap Rakes and there Windrow Pro.

Attach-Matic

Summer 2017, Attach-Matic will release there full line of Implements and accessories for compact tractors (25-50 HP)

Already launched in Quebec they will focus on the Quebec market for spring before launching in Ontario

Meyer

In 2016 Meyer introduced the RT series Forage boxes to again put them ahead of the competition in Forage box design and features.

Summer 2017, Meyer will introduce there **SXI Series V** bottom manure spreaders to again make them leaders in the spreader industry.

Highline

Proto-type's already in the field being ready to be tested for spring, Highline has there new range of rock rakes with many features and benefits scheduled for 2018 Booking Program.

Remlinger - engineers re-design the Screening bucket to perfect performance of the PFM product.

- Ideal for commercial and residential landscaping, farms, industrial uses, golf courses, baseball fields, beaches and many more applications
- Screens dirt, gravel, sand, demolition debris, large rocks and more
